Carlton Lindsay

Design Engineer

Profile

I build what I design. AI-native interfaces from concept to production: knowledge-graph explorers, multi-agent pipeline UIs, research tools. Interaction design and production React / TypeScript. Building for the web since 2019. Before that, hardware prototyping: Apple Vision Pro, VR hardware, medical devices.

Skills

Frontend	React · TypeScript · design systems · component libraries · data visualization · knowledge graphs · React Flow · SSE and real-time state
Backend	Python · FastAPI · Node.js · GraphQL
Design	Interaction design · UX/UI · motion · information hierarchy · design research · prototyping · accessibility
AI	Claude Code · Cursor · LLM integration · multi-agent UX · agentic workflows

Experience

Design Engineer & Product Lead, Futurity Systems, Barcelona 2025 – Present
FAST, research platform. Lead frontend, lead UX/UI. Knowledge-graph explorer (10,000-node graphs) · React Flow workflow DAGs · LLM invention tools · browser extension · Chakra-based design system.
Futurity Engine, multi-agent research engine. UI concept prototype, then production frontend. SSE streaming · five-phase agent pipeline · live knowledge graph · FastAPI backend contributions.
Futurescaper, futures-exploration tool. End to end, solo rebuild. UI · custom graph-layout engine · backend AI orchestration.
Futures Garden, EU exhibit. Concept and interaction design. LLM characters · NFC objects.

Hardware Associate Engineer, Apple (Vision Pro) 2022 – 2023
Planned, built and ran two prototyping labs for Vision Pro teams. Managed a small team.

Product Development Lab Manager, Pensar Development, Seattle 2016 – 2022
Lab Equipment Portal (2019 – 2022), internal tool, designed and built solo over three versions. HTML page with an Azure backend, then an Electron workstation app, then a full-stack mobile web app with QR-code check-out. React · Node.js · GraphQL. Used by the whole engineering team.
Prototyping lab. Consumer electronics, VR hardware, medical devices. Rapid prototyping · CNC machining · 3D printing · SolidWorks MCAD · PCB layout and rework · LabVIEW test fixtures. Builds. Led prototype and production builds with small teams, up to 500 units.
Earlier: Senior PCB Repair Technician, FUJIFILM SonoSite (2015 – 2016) · Robotics Technician, Hydromax USA (2014 – 2015)

Education

Master's, Interaction Design, Harbour.Space University, Barcelona 2023 – 2025
Research with Campus AI: 42-respondent survey · 8 depth interviews · 1,117 coded moments.

Portfolio

carlton.dev Case studies with working demos.
